SPRING BULLS

The spring bulls are a front pasture set with many having EPD's in the top 20% of the breed. Fed a high roughage diet, they won't melt in the pasture. Whether you are looking for growth and performance, or a heifer candidate, you'll find them in this group of bulls. All spring bulls have adjusted 205 weaning weights.

LIMOUSIN TODAY
PROFIT TOMORROW

Whether you are a producer or a feeder, whether you sell calves or retain ownership, wherever you are, whatever you cowherd, whatever your market; Limousin and Lim-Flex genetics can enhance your profit from the pasture to the rail.

Limousin remains atop the Continental breeds for feed efficiency.

Limousin cattle maintain high feed efficiency at higher finishes and deeper in the feeding cycle.

Limousin can eliminate Yield Grade 4 and 5 cattle and increase percent Yield Grade 2 in one generation.

Limousin cattle excel in percent retail product, yield grade and ribeye area.

In tasting panels, Limousin beef ranks high for tenderness, juiciness and flavor.
